Not illustrated. 1915 Excerpt: .the expense of a steel-die. that parts wanted in small quantities usually are not die-casting propositions. Cast-iron parts with little machining do not prove any saving. the handicap on the cost of material is too great to overcome to make an attractive showing. Generally speaking. intricate parts made in brass and used in large quantities yield the greatest saving. However. circumstances and individual cases differ so much that no general rule can be outlined and. therefore. we gladly give our advice on any part at any time. or enter into correspondence on all subjects relating to die-casting with parties interested or seeking information. The following is a brief attempt to give the main characteristics of our different alloys and their usefulness. No. 3 Metal. Zinc. alloy hard. good bearing metal. compares favorably with cast iron. Can be plated any color. No. 47 Metal. Tin alloy. Good...
